ODG by MCG 2025 Updates

ODG by MCG will release its yearly metrics update on **Friday, January 17, 2025**. This contains updates to the following content:

- Return-to-Work benchmarks in all ODG solutions
- TAO Index/UR Advisor data in ODG for Workers' Compensation and ODG for Auto Injury
- The ODG Risk Assessment Scores in ODG for Workers' Compensation and LTD Predictor in ODG for Disability

ODG return-to-work data is used to help optimize timely return-to-work and accurate reporting. These metrics are updated annually and can be filtered by diagnosis and procedure, including ICD-9, ICD-10, and CPT with claims-specific modeling using comorbidities, demographics, and confounding factors. The update of the return-to-work data triggers an automatic update of the related ODG Risk Assessment Scores.

The Summary of Changes for this content is available and located under the "What's New" section on the Help & Training page.

The ODG application update will be available by the end of the day on **Friday, January 17, 2025**.

If you have any questions or feedback, contact your ODG Account Manager or the ODG Helpdesk at odghelp@mcg.com.
